Design Decisions

- Tried to keep UX as simple as possible:
- 1. No more than the required 4 pages
- 2. Tried to keep pages uncluttered
- 3. Tried to keep in mind that employers do not have time for multitude of words in a position application.

Challenges Thus far

Responsiveness

- Navbar will collapse to hamburger, but will not function
- 2. Project section cards do not collapse
- Styling
- 1. No sense of style and aesthetics
- 2. Code looks like my five year old wrote it

Challenges cont.

Designing the cards

1. Sizing the images was challenging as image quality was often lost. More a consequence of my ignorance re – images and resolution and stuff.

Confused and frustrated

- 1. I am getting old and impatient. Sometimes because it works I will not change it, even though the code is messy and inefficient.
- 2. I get confused after writing a lot of code and at times, forget what I was doing or what I have done.
